

Organic

LAYER PELLETS 18%

Organic Layer Pellets 18% are simple to feed and packed with protein to provide exceptional

support during molting season or anytime your flock needs a boost. Whether fed year-round or seasonally, these high protein pellets will keep feathers fluffy and the eggs a-comin' with easy feeding effort!

PROTEIN NEEDS

20+
WEEKS

CHICKENS

DUCKS

Extra protein during fall and winter may boost egg production in some breeds.

Molting recovery support to grow warm feathers in preparation for cold weather.

Choose Organic Layer Pellets 18% when situations and seasons call for higher levels of protein nutrition.

Metabolic adaptation in response to cold weather to help keep birds warm.

Increased protein to compensate for decreased access to insects and forage due to snow and frozen ground.
