- 4 lbs Cluckin' Good Layer Grit
- 10 oz Cluckin' Good Organic Herbs

CHICKEN FEEDING GUIDE
Generally, a single hen may eat about a 1/2 cup of feed per day. The following figures are estimates for laying chickens. Feed consumption varies based on bird type, fermentation, and other food scraps provided to the flock. Fermenting our feeds increases nutrients, incorporates the fines (feed granules), and requires less feed per serving. Visit scratchandpeck.com/ferment-feed for instructions.
